THE AIR FILTER SALES & SERVICE EXPERTS

No one likes changing their air filters! They are dirty, usually in hard to reach unsafe areas, are bulky to dispose of and the entire process is very time consuming and physically demanding.

However, if your filters are not replaced on time and properly it can end up costing you big money. Dirty filters extract energy dollars out of your fan motors. Contaminated air you breathe can cause illness and missed work. Dirty coils require more energy to operate.

Let Air Filter Engineers put together a cost effective turnkey program for your facility! We will perform an onsite visit to determine the best filters for your application and recommend the proper replacement frequency. We do all the work freeing up your teams valuable time. Scheduled service, delivery of all your filters, installation, and disposal of dirty filters= peace of mind for you!

Coil cleaning, belt replacement and fan motor lubrication can be combined with our filter replacement program.

Cost effective preventive maintenance helps avoid costly repairs!

**Chicagoland's
largest stocking
distributor of
Air, Liquid, and
Industrial filtration
products!**
